

DEPARTMENT OF ENVIRONMENTAL PROTECTION & SUSTAINABILITY

Interoffice Memo

TO: Carlos A. Vidal, P.E.
Water Design Section, Department of Public Works

FROM: Vincent J. Gardina, Director /signed/
EPS

DATE: July 2, 2015

SUBJECT: KENWOOD AVENUE WATER MAIN REPLACEMENT
Stormwater Management Variance
Back River Watershed
EPS Project ID: M150165
Tracking Number: 06-15-2010

This office has reviewed the information submitted and finds that a stormwater management variance can be granted for this project under Section 33-4-113 (a) (2) of Title 4 of the Baltimore County Code. This section of the regulations allows a stormwater management variance to be granted if there are exceptional circumstances such that strict adherence to the provisions of this article would result in unreasonable hardship or practical difficulty and not fulfill the intent of the regulations.

This project is for the construction of a water main. The existing cover conditions will be re-established once the water main is installed. Although the disturbed area is in excess of 5,000 square feet, there will be no increase in impervious area or runoff resulting from the project.

Please contact Robert T. Wood, Jr. of my staff at 410-887-3768 should you have any questions.
